## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, C (Basic), Java (OOP Basics)

**Frontend:** React.js, Tailwind CSS, Bootstrap, EJS, Media Queries

**Backend:** Node.js, Express.js

**Databases:** MongoDB, PostgreSQL

**State Management:** Zustand, Context API, Session Storage

**Tools & Platforms:** Git, GitHub, Linux, AWS (EC2), Firebase, Vercel, Figma

**Other Skills:** REST APIs, Data Structures & Algorithms (Basic)

## CERTIFICATIONS

### JavaScript (Basic) Certificate

HackerRank

Certification ID: 75e4d6a7b388

- Demonstrated proficiency in JavaScript fundamentals, data structures, and problem-solving
- Certificate URL: [View Certificate](#)

## EXPERIENCE

### Self-Taught Full Stack Developer

2023 – Present

Independent Learning & Project Development

Kerala, India

- Built 9+ full-stack web applications using MERN stack with focus on user experience and performance
- Developed e-commerce platforms with payment integration, user authentication, and admin dashboards
- Mastered modern React patterns, state management (Redux, Zustand), and TypeScript for type-safe development
- Overcame significant health challenges (Bell's Palsy) and rebuilt technical skills demonstrating resilience and adaptability

### Millwright Fitter

2022 – 2023

Hajee A. P. Bava & Company (HAPBCO)

Jharkhand, India

- Worked on erection and assembly of heavy industrial machinery—boilers, conveyors, pipelines and structural steel—across large-scale projects in cement, petrochemical, steel, and power plant sectors
- Performed precision alignments, mechanical installations, and conveyor fabrication following strict quality and safety protocols
- Collaborated with engineering and project management teams to ensure timely commissioning of major plant equipment

### Accountant

2020 – 2022

KPA Crusher Private Limited (Beta Crusher)

Kerala, Malappuram

- Managed day-to-day financial operations including bookkeeping, ledgers, and invoice processing for stone crushing operations
- Prepared periodic financial statements, expense reconciliations and supported audit documentation to ensure transparency and compliance
- Coordinated with operations team to align finances with production schedules, cost tracking and budgeting

## PROJECTS

---

### Fashion E-commerce (Full Stack) | Node.js, Express, MongoDB, EJS, Razorpay, AWS

2024

- Built a complete e-commerce platform with Google login, email OTP authentication, and dynamic cart system
- Implemented Razorpay payment integration, admin dashboard for product and order management
- Deployed on AWS with scalable architecture supporting secure user sessions and multiple concurrent users
- GitHub: [View Code](#)

### Netflix Clone (Full Stack) | React, Node.js, Express, MongoDB, Zustand, TMDB API

2024

- Full-stack streaming service clone with comprehensive movie browsing, detailed cast pages, and user management
- Implemented seamless search/filter for both movies and actors with global state management using Zustand
- Built detailed movie pages with cast information, recommendations, and integrated TMDB API for real-time content
- Used MongoDB for user data persistence and implemented movie history tracking features
- GitHub: [View Code](#)

### OLX Clone | React, Tailwind CSS, Firebase

2024

- Developed a marketplace clone with product listings, advanced search functionality, and user interactions
- Integrated Firebase for real-time data management, user authentication, and modern React patterns
- Implemented responsive design with modern UI/UX principles using Tailwind CSS
- GitHub: [View Code](#) | Live: [Demo](#)

### Job List App (Full Stack) | React, Node.js, Express, Tailwind CSS

2024

- Modern job listing platform with React frontend and Node.js backend, featuring clean design
- Built RESTful APIs for job management and implemented responsive layout with Tailwind CSS
- Used modern development workflows for optimized performance and user experience
- GitHub: [View Code](#)

### Advanced Todo App | React, Session Storage, Tailwind CSS

2024

- Feature-rich task management app with session storage persistence and category organization
- Implemented task categorization, priority levels, and clean UI design with intuitive user experience
- Built with responsive design principles and local data persistence capabilities
- GitHub: [View Code](#) | Live: [Demo](#)

### Weather Dashboard | React, OpenWeather API, Geolocation

2024

- Real-time weather application with dynamic data visualization and geolocation support
- Integrated OpenWeather API for accurate weather data and automatic location detection
- Built interactive dashboard with weather forecasts and location-based services
- GitHub: [View Code](#)

### TypeScript CRUD App | React, TypeScript, Tailwind CSS

2024

- Clean implementation of CRUD operations with React and TypeScript for type-safe development
- Built reusable components with strong typing for better code maintainability and error handling
- Demonstrated advanced TypeScript features and modern React development patterns
- GitHub: [View Code](#)

### Digital Clock with Alarm | HTML5, CSS3, JavaScript, Web Audio API

2024

- Feature-rich digital clock with real-time updates, theme toggle, and advanced alarm system
- Implemented Web Audio API for alarm functionality with smooth animations and multiple themes
- Built with responsive design and intuitive user interface for enhanced user experience
- GitHub: [View Code](#) | Live: [Demo](#)

### Calculator Application | HTML5, CSS3, JavaScript

2024

- Responsive calculator with clean design and real-time input/output display
- Implemented advanced mathematical operations with comprehensive error handling
- Built with vanilla JavaScript demonstrating fundamental programming concepts and responsive design
- GitHub: [View Code](#) | Live: [Demo](#)

### Appy Fizz Responsive Clone | HTML, CSS, JavaScript, Bootstrap, Media Queries

2024

- Responsive clone of Appy Fizz website demonstrating advanced CSS and responsive design techniques
- Implemented Bootstrap framework with custom media queries for optimal cross-device compatibility
- Built interactive elements with JavaScript and maintained pixel-perfect design accuracy
- GitHub: [View Code](#) | Live: [Demo](#)

**First Responsive Portfolio | HTML, CSS, Bootstrap, Google Forms, Media Queries**

2024

- Responsive portfolio website with Google Form integration for contact submissions
- Implemented Bootstrap framework with custom media queries for responsive design across all devices
- Built professional portfolio showcasing early web development skills and design principles
- GitHub: [View Code](#) | Live: [Demo](#)

**Kiwi Static Clone | HTML, CSS**

2024

- Static clone of Kiwi website demonstrating fundamental HTML and CSS skills
- Implemented clean, pixel-perfect design with attention to detail and responsive layout principles
- Built using semantic HTML and modern CSS techniques for optimal performance
- GitHub: [View Code](#) | Live: [Demo](#)

**Huawei Static Clone | HTML, CSS**

2024

- Static clone of Huawei website showcasing advanced CSS layout and design techniques
- Implemented modern web design principles with focus on visual hierarchy and user experience
- Built with clean, maintainable code structure and attention to cross-browser compatibility
- GitHub: [View Code](#) | Live: [Demo](#)

**ADDITIONAL INFORMATION**

---

**Career Transition**

2023

- Successfully transitioned from operations/accounting background to software development
- Demonstrated resilience and perseverance by overcoming health challenges while learning
- Self-motivated learner with strong problem-solving abilities and growth mindset
- Passionate about building real-world solutions and contributing to development teams
